Unit

FIT3045 - Industry-based learning

Overview

Students on placement participate full time in a defined, graduate level role during a 22-week placement period at established partners of the Faculty of IT industry based learning program including major global companies, leading Australian companies and worldwide consultancies. The students on placement apply the knowledge, skills and practices of professional attitudes and behaviour developed in their academic units. They develop communication, time management, self-reflection and customer service skills in business situations, experience and participate professionally in the corporate environment and obtain feedback from experienced supervisors on their performance.

- Second semester, Malaysia, On-campus

Learning outcomes

On successful completion of this unit, you should be able to:

1. Set achievable and measurable goals;

2. Identify useful theoretical knowledge that has been covered in prior coursework and knowledge that has not yet been covered;

3. Develop and practice professional skills and attitudes including: initiative, communication, time-management and teamwork skills in a business environment;

4. Develop solutions to business problems using information technology and other techniques;

5. Prepare documentation and written reports of a professional standard;

6. Address performance improvement opportunities identified by industry supervisors and self-assess opportunities for personal development;

7. Develop information technology skills (such as business process modelling, performance enhancement of installed software, updating current software and developing new software) in a complex, corporate business environment.
